

# **FREE NURSING CARE OF THE WOMAN RECEIVING REGIONAL ANALGESIA ANESTHESIA**

**Ms. Prince Shields**

## **Nursing Care Of The Woman Receiving Regional Analgesia Anesthesia Introduction**

### **Nursing Care of the Woman Receiving Regional Analgesia/Anesthesia**

Nurses caring for women undergoing obstetric regional analgesia are challenged to support the uniqueness of each labor and birth experience while maintaining a safe environment for the woman and her fetus. This updated guideline provides evidence-based clinical practice recommendations for nursing assessment and monitoring of women undergoing neuraxial, or regional, analgesia and anesthesia during labor that will help nurses provide the best possible patient care. Guidelines for assessment of the woman's readiness for labor analgesia are presented with referenced rationales. This edition features comprehensive evidence-based nursing assessments and interventions necessary to help the perinatal nurse: \* Ensure necessary preparation for anesthesia and supportive nursing care \* Implement appropriate immediate post-procedure and ongoing nursing assessments and interventions \* Evaluate the maternal and fetal response to regional analgesia/anesthesia and \* Minimize the risk of untoward effects. Emerging research about trends and issues in obstetric anesthesia and information about new therapies for the management of anesthesia-related emergencies is also included, as is rationale for AWHONN's position on the role of the registered nurse in caring for pregnant women receiving regional analgesia and anesthesia. Included CNE activity and posttest help validate knowledge and competence regarding regional analgesia during labor. The information presented in this guideline can be used by childbirth educators to help guide childbirth preparation about labor analgesia and anesthesia and is an essential resource for all nurses who care for women during labor. Each copy of the guideline includes a Quick Care Guide that summarizes key assessments and interventions, providing a convenient bedside reference.

### **Nursing Care of the Woman Receiving Regional Analgesia/ Anesth in Labor**

An evidence-based clinical practice guideline presenting information necessary to: Prepare the patient for regional analgesia/anesthesia, including PCEA Provide maternal-fetal assessment and interventions during the post-procedure period and throughout labor Assess and manage maternal-fetal side effects of regional analgesia and anesthesia during labor

### **Intrapartum Management Modules**

The revised Fourth Edition of this essential text contains 19 modules that guide the reader from assessment of the pregnant woman and her fetus, through labor and delivery, to postpartum evaluation and care. Each module is carefully developed to enhance self-paced learning and skills attainment, perfect for competence validation and orientation. This edition has new modules on cultural competence and OB Emergencies, including hemorrhage and Caesarian delivery \"on demand\"

## **Perinatal Nursing**

Co-published with the Association of Women's Health, Obstetric and Neonatal Nurses (AWHONN), this book is a comprehensive clinical resource for practicing perinatal nurses and an excellent staff educator's guide and textbook. It provides commonly accepted guidelines for practice and evidence-based care and includes algorithms to support decision-making. Numerous photographs complement the text and summary boxes highlight key points. Appendices provide patient care examples and practice guidelines. This edition has been extensively revised and updated. New features include more than 650 end-of-chapter review questions and answers and selected AWHONN protocols.

## **Maternal-Child Nursing Care Optimizing Outcomes for Mothers, Children, & Families**

It offers the perfect balance of maternal and child nursing care with the right depth and breadth of coverage for students in today's maternity/pediatric courses. A unique emphasis on optimizing outcomes, evidence-based practice, and research supports the goal of caring for women, families and children, not only in traditional hospital settings, but also wherever they live, work, study, or play. Clear, concise, and easy to follow, the content is organized around four major themes, holistic care, critical thinking, validating practice, and tools for care that help students to learn and apply the material.

## **Maternal-Child Nursing**

Ideal for accelerated maternity and pediatrics courses, Maternal-Child Nursing, 4th Edition is filled with user-friendly features to help you quickly master essential concepts and skills. It offers completely updated content that's easy to read and understand. Plus, active learning tools give you the chance to practice applying your knowledge and make learning fun! Critical Thinking Exercises allow you to apply your knowledge to realistic clinical situations. Nursing care plans assist you with applying the nursing process to plan individualized care for the most common maternity and pediatric conditions. Critical to Remember boxes summarize and highlight essential, need-to-know information. Communication Cues provide practical tips for effective verbal and nonverbal communication with patients and families. Clinical Reference sections in pediatric chapters present information relevant to each body system, including anatomy and physiology, differences in the pediatric patient, and related laboratory and diagnostic tests. Integrated electronic features match icons in the text, so you can use print and electronic resources more effectively together. Using Research to Improve Practice boxes help you determine proper care to reinforce best practice. Spanish translations are included for phrases commonly encountered with maternity and pediatric patients. Improved design makes the text easier to read, and up-to-date photos ensure accuracy.

## **AWHONN's Perinatal Nursing**

A comprehensive resource for practicing perinatal nurses. Provides commonly-accepted guidelines for practice as well as evidence-based care. Extremely useful as a clinical resource as well as staff educator's guide and textbook. Co-publishing with AWHONN provides additional credibility to this book.

## **Foundations of Maternal-Newborn and Women's Health Nursing - E-Book**

Make sure you fully understand how to care for women and newborns! Foundations of Maternal-Newborn and Women's Health Nursing, 8th Edition integrates essential maternity information into the overall continuum of nursing care to show you how to provide safe care in the clinical setting. With easy-to-understand language, this updated text uses evidence-based guidelines and step-by-step instructions for assessments and interventions to help you quickly master key skills and techniques. Also emphasized is the importance of understanding family, communication, culture, patient teaching, and clinical decision making. Questions for the Next Generation NCLEX® in the text help you prepare for the exam. Contributing content from known experts in the field of maternal and women's health. Unfolding case studies help you apply what

you've learned to practice. Safety checks integrated into the content help you develop competencies related to safe nursing practice. Chapter summaries appear at the end of each chapter and help you review core content in each chapter while on the go. Patient teaching boxes provide teaching guidelines, including communication guides, directed at patients and families. Critical to Remember boxes highlight and summarize need-to-know information. Application of Nursing Process sections help you apply the nursing process to clinical situations. Updated! Drug guides list important indications, adverse reactions, and nursing considerations for the most commonly used medications. Procedure boxes provide clear instructions for performing common maternity skills with rationales for each step. UNIQUE! Therapeutic Communications boxes present realistic nurse-patient dialogues, identifying communication techniques and showing ways to respond when encountering communication blocks. Knowledge Check helps you assess your mastery of key content. Glossary provides definitions of all key terms. NEW! Critical Care Obstetrics chapter features the latest information on this vital topic. NEW! Clinical judgment content and questions for the Next Generation NCLEX® help you prepare for the exam and clinical practice.

## **Foundations of Maternal-Newborn and Women's Health Nursing**

With easy-to-read coverage of nursing care for women and newborns, Foundations of Maternal-Newborn & Women's Health Nursing, 6th Edition shows how to provide safe, competent care in the clinical setting. Evidence-based guidelines and step-by-step instructions for assessments and interventions help you quickly master key skills and techniques. Also emphasized is the importance of understanding family, communication, culture, client teaching, and clinical decision making. Written by specialists in maternity nursing, Sharon Smith Murray and Emily Slone McKinney, this text reflects the latest QSEN competencies, and the accompanying Evolve website includes review questions to prepare you for the NCLEX® exam! Nursing Care Plans help you apply the nursing process to clinical situations. Procedure boxes provide clear instructions for performing common maternity skills, with rationales for each step. UNIQUE! Therapeutic Communications boxes present realistic nurse-patient dialogues, identifying communication techniques and showing to respond when encountering communication blocks. Communication Cues offer tips for interpreting patients' and families' verbal and nonverbal communication. Critical Thinking exercises focus on clinical situations designed to test your skills in prioritizing and critical thinking. Updated drug guides list important indications, adverse reactions, and nursing considerations for the most commonly used medications. Check Your Reading helps you assess your mastery of key content. Critical to Remember boxes highlight and summarize need-to-know information. Want to Know boxes provide guidelines for successful client education. Glossary provides definitions of all key terms. NEW! Safety Alerts help you develop competencies related to QSEN and safe nursing practice. NEW! Unfolding case studies help you apply what you've learned to practice. UPDATED Evidence-Based Practice boxes highlight the latest research and the most current QSEN (Quality and Safety Education for Nurses) practice guidelines for quality care. UPDATED content includes the late preterm infant, fetal heart rate pattern identification, obesity in the pregnant woman, and the QSEN competencies.

## **Maternal-Newborn Nursing**

A better way to learn maternal and newborn nursing! This unique presentation provides tightly focused maternal-newborn coverage in a highly structured text

## **Intrapartum Management Modules**

Confidently deliver safe, accurate intrapartum care with the expert guidance of Intrapartum Management Modules, 5e. This essential, fully updated edition offers easy-to-follow directions on the full range of intrapartum skills, from admission assessment of the laboring woman and fetus to delivery and postpartum care. Written by top-level intrapartum nurses and educators, this is not only an essential study aid for inpatient obstetric nursing certification; it also offers indispensable orientation support to new practitioners. Absorb the A to Z of intrapartum nursing science and skills . . . NEW and updated content offers the latest

evidence-based therapeutic methods, drugs, and technology NEW chapter on electronic fetal heart rate monitoring Practice strips for monitoring fetal heart rate and contractions End-of-module practice/review questions and end-of-book posttests to aid retention and bulletproof exam preparation Centers for Disease Control guidelines for safe labor and delivery National Institute of Child Health and Human Development guidelines for accurate electronic fetal monitoring Self-paced independent learning manual—step-by-step directions for vital skills, including: Physical exam of the laboring woman Evaluating contractions Meeting the individual and cultural needs of the laboring woman and family Identifying the high-risk mother and fetus Assessing fetal health Managing gestational diabetes Determining whether a patient is at risk for domestic violence Evaluating fetal lie and presentation Breathing and effleurage techniques Managing an unexpected delivery

## **Maternity, Newborn, and Women's Health Nursing**

Maternity, Newborn, and Women's Health Nursing: A Case-Based Approach, 2nd Edition presents realistic, patient-centered, case-based narratives that captivate students while instilling essential critical thinking skills and clinical judgment capabilities. 13 in-depth, unfolding case studies threaded throughout the text enrich students' understanding of key concepts and align with the latest NCLEX® testing plan to prepare students for the challenges ahead in class, on their exams, and beyond. This updated 2nd Edition is enhanced with inclusive, bias-free language, robust essential nursing competency learning features, and the most current perspectives on care to help students ensure positive outcomes for an increasingly diverse patient population.

## **Frontiers in Pain Research**

Pain is an emotion experienced in the brain, it is not like touch, taste, sight, smell or hearing. It is categorised into Acute Pain less than twelve weeks duration and Chronic Pain if over twelve weeks. Pain can be perceived as a warning of potential damage, but can also be present when no actual harm is being done to the body. This book examines new research into the causes, symptoms and treatments of pain.

## **Maternal-Child Nursing - E-Book**

NEW! Next Generation NCLEX® (NGN) examination-style case studies expose students to how content will be tested in the exam; case studies are either single-situation or unfolding studies. NEW! Updated Drug Guides summarize the latest information on medications.

## **Fetal Heart Monitoring**

Designed to meet the needs of today's students, Lowdermilk's Maternity Nursing, 8th Edition - Revised Reprint addresses the fundamentals of maternity nursing with a concise, focused presentation of the care of women during the childbearing years. Integrating considerations for family, culture, and health promotion into the continuum of care, it also addresses community-based care to emphasize that nursing care takes place in many settings. Maternity Nursing focuses on childbearing issues and concerns, including care of the newborn, as well as wellness promotion and management of common women's health problems. Critical thinking exercises present case studies of real-life situations and corresponding critical thinking questions to help you develop your analytical skills. NEW! A helpful appendix identifies text content that reflects the QSEN competencies - patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics - to assist you in developing competencies to provide safe and effective nursing care. NEW! Focus on the family recognizes the nurse's need to integrate the family in the care of the mother and newborn and the importance of the role of the mother to the wellbeing of the family. NEW! Content updates throughout, including information on the late preterm infant and associated concerns such as feeding; guidelines on prioritization and delegation where relevant; and centering pregnancy, a new model of health care that brings women together in groups for their care. NEW! Evidence-based practice content focuses your attention on how to use current research to improve patient outcomes. NEW! Improved

readability helps you learn more efficiently with shorter, more focused content discussions. NEW! 21st Century Maternity Nursing: Culturally Competent, Community Focused chapter combines introductory material, culture, and community into one chapter to help you focus on key content and concepts. NEW! Streamlined content highlights the most essential, need-to-know information.

## **Maternity Nursing - Revised Reprint**

This textbook provides an up-to-date summary of the scientific basis, assessment for and provision of anaesthesia throughout pregnancy and labour. It is divided into nine sections including physiology, assessment, complications and systemic disease.

## **Oxford Textbook of Obstetric Anaesthesia**

Here's the essential clinical information you need to care for obstetric, gynecological, newborn, and pediatric patients in any setting. The 3rd Edition of this popular pocket guide has been thoroughly revised and updated to reflect nursing practice today.

## **OB/GYN Peds Notes**

Written by the foremost experts in maternity and pediatric nursing, Maternal Child Nursing Care, 5th Edition offers the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX® examination. This new edition offers numerous content updates throughout the text to keep you up-to-date on the latest topics and best practices. Plus hundreds of illustrations, alert boxes, and tables clarify key content and help you quickly find essential information. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Critical thinking case studies offer opportunities to test and develop your analytical skills and apply knowledge in various settings. Emergency boxes in the maternity unit guide you through step-by-step emergency procedures. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Family-Centered Care boxes highlight the needs or concerns of families that you should consider to provide family-centered care. NEW! Content updates throughout the text give you the latest information on topics such as the late preterm infant, fetal heart rate pattern identification, obesity in the pregnant woman, shaken baby syndrome/traumatic brain injury, Healthy People 2020, car restraints, immunizations, and childhood obesity. NEW! Updated Evidence-Based Practice boxes including QSEN KSAs (knowledge, skills, attitudes) provide the most current practice guidelines to promote quality care. NEW! Medication Alerts stress medication safety concerns for better therapeutic management. NEW! Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice.

## **Maternal Child Nursing Care**

Short, concise summary of clinical and non-clinical aspects of obstetric analgesia and anaesthesia for trainees and seniors.

## **Analgesia, Anaesthesia and Pregnancy**

Maternal Child Nursing Care - E-Book

## **Maternal Child Nursing Care - E-Book**

This new book will be a core text for undergraduate Maternity/Newborn courses. It also will work for courses

emphasizing Women's Health across the lifespan. Coverage includes core content on preconception, pregnancy, labor, birth, and postpartum. In addition, the text focuses on important topics throughout a woman's life: health promotion, nutrition, medical issues, psychosocial issues, sexuality, family, fertility control and issues, menopause, and aging. While other texts touch on the different stages of a woman's lifespan, this book provides more detail and information in areas outside the average maternity text.

## **Maternity, Newborn, and Women's Health Nursing**

Part of the popular LPN Threads series, *Introduction to Maternity ; Pediatric Nursing* provides a solid foundation in obstetrics and pediatric nursing. An easy-to-follow organization by developmental stages, discussion of disorders by body system from simple-to-complex and health-to-illness, and a focus on family health make it a complete guide to caring for maternity and pediatric patients. Written in a clear, concise style by Gloria Leifer, MA, RN, this edition reflects the current NCLEX test plan with additional material on safety, health promotion, nutrition, and related psychosocial care. "... provides clinical information and insights in a concise, structured and informative way that encourages critical thinking." Reviewed by Kim Shrieves on behalf of Nursing Times, April 2015 Concise, yet comprehensive, content is presented within the scope of practice for the LVN/LPN, but with sufficient depth to facilitate students in a ladder program allowing them to be successful with the ADN program requirements for the specialties. Step-by-step procedure lists throughout the text help you master important maternity and pediatric nursing processes with Skills Performance Checklists available on the Evolve website. Nursing Care Plans with Critical Thinking Questions reinforce the nursing process and strengthen problem-solving skills as applied to maternity nursing. Logical organization of content from simple-to-complex and health-to-illness makes locating and accessing information easy. Key terms with phonetic pronunciations and text page references help improve terminology and language skills of English-as-a-Second-Language (ESL) students and students with limited proficiency in English, before they enter clinical practice. Health Promotion boxes emphasize the importance of family-centered care, health promotion and illness prevention, women's health issues, and growth and development of child and parent to help you understand and teach wellness and disease prevention to patients in your care. Nutrition content highlights the importance of proper nutrition for women before, during, and after pregnancy (for those who are breastfeeding), as well as critical information about the nutrition needs and problems of newborns, infants, and children. Nursing Tips throughout provide pertinent information applicable in the clinical setting that reinforces what you have just learned while building on previously learned information. NEW! Unfolding case studies with illustrations follow first-time parents Tess and Luis throughout the stages of pregnancy and birth of their twins, with a series of critical thinking questions. NEW! Updated NCLEX exam-style review questions have been revised to a higher cognitive level to better reflect the NCLEX examination. NEW! Expanded coverage of bioterrorism and natural disasters better reflects the evolving role of the nurse in disaster situations. NEW! Enhanced appendix includes Pediatric Lab Values for quick and easy reference.

## **Introduction to Maternity and Pediatric Nursing**

Explains how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Features more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, this text includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. --From publisher description.

## **Maternal Newborn Nursing Care Plans**

Accompanying CD-ROM contains ... "case studies, clinical thinking questions, videos, animations, a care plan constructor, illustrated skills, English-Spanish translations, and an audio glossary." --Page 4 of cover.

## **Maternity & Women's Health Care**

This new addition to our highly successful *A Practical Approach to Anesthesia* series is a comprehensive, accessible guide to obstetric anesthesia, with the substance and depth of a textbook and the convenient, user-friendly features of a handbook. It focuses sharply on clinical issues and is written in outline format for quick reference, with numerous tables, figures, and photographs. Major sections cover pharmacology and physiology, antepartum considerations, labor and delivery, postpartum issues, and disease states in obstetric patients, including a chapter on obesity and pregnancy. The concluding chapter reviews current guidelines from the American Society of Anesthesiologists, American College of Obstetricians and Gynecologists, and American Academy of Pediatrics.

### **A Practical Approach to Obstetric Anesthesia**

The clinical practice of anesthesia has undergone many advances in the past few years, making this the perfect time for a new state-of-the-art anesthesia textbook for practitioners and trainees. The goal of this book is to provide a modern, clinically focused textbook giving rapid access to comprehensive, succinct knowledge from experts in the field. All clinical topics of relevance to anesthesiology are organized into 29 sections consisting of more than 180 chapters. The print version contains 166 chapters that cover all of the essential clinical topics, while an additional 17 chapters on subjects of interest to the more advanced practitioner can be freely accessed at [www.cambridge.org/vacanti](http://www.cambridge.org/vacanti). Newer techniques such as ultrasound nerve blocks, robotic surgery and transesophageal echocardiography are included, and numerous illustrations and tables assist the reader in rapidly assimilating key information. This authoritative text is edited by distinguished Harvard Medical School faculty, with contributors from many of the leading academic anesthesiology departments in the United States and an introduction from Dr S. R. Mallampati. This book is your essential companion when preparing for board review and recertification exams and in your daily clinical practice.

### **Essential Clinical Anesthesia**

Acute Pain Medicine is the first comprehensive, case-based text of its kind that explores the essential topics of acute pain medicine, including interventional, pharmacologic, and diagnostic considerations. Written and edited under the auspices of the American Academy of Pain Medicine by members of the Academy's Shared Interest Group for Acute Pain Medicine, the text includes an introduction to acute pain medicine and an easily referenced interventional section. Chapters focus on patients experiencing acute pain from either surgery or other medical conditions and include detailed information on the diagnosis and treatment of specific cases in acute pain medicine. The text is rounded out by the complete content of the thoroughly revised *Military Advanced Regional Anesthesia and Analgesia Handbook (MARAA II)*. Although the MARAA handbook gained its reputation as a useful resource for managing the pain associated with battlefield trauma, its beautifully illustrated step-by-step guidance is useful for providing vital acute pain services in all settings. Acute Pain Medicine is an ideal, complete resource for physicians, fellows, and residents managing acute pain patients.

### **Standards for Professional Nursing Practice in the Care of Women and Newborns**

Authors Susan Ricci and Terri Kyle have teamed up to deliver a unique resource for your students to understand the health needs of women and children. This new combination book, *Maternity and Pediatric Nursing*, will empower the reader to guide women and their children toward higher levels of wellness throughout the life cycle. The textbook emphasizes how to anticipate, identify, and address common problems to allow timely, evidence-based interventions. Features include unfolding case studies throughout each chapter, multiple examples of critical thinking, and an outstanding visual presentation with extensive illustrations depicting key concepts. A bound-in CD-ROM and a companion Website include video clips and NCLEX®-style review questions.

## **Acute Pain Medicine**

This full-color LPN/LVN-level textbook presents maternity nursing using a nursing process framework. Throughout the text are features that help students develop critical thinking skills and apply content to practice—such as nursing procedures, nursing care plans, clinical pearls, patients' and caregivers' stories, critical thinking questions, cultural snapshots, family teaching tips, and over 200 illustrations. Each chapter is followed by an integrated study guide/workbook with NCLEX®-style questions, Critical Thinking: What Would You Do? scenarios including dosage calculations, and Study Activities including Internet activities. Introductory Maternity Nursing is an ideal complement to Hatfield, Broadribb's Introductory Pediatric Nursing, Sixth Edition. Instructors who prefer a combined maternity/pediatric text can use Klossner/Hatfield, Introductory Maternity and Pediatric Nursing.

## **Maternity and Pediatric Nursing**

Written specifically for the LPN/LVN student, this Third Edition of Introductory Maternity and Pediatric Nursing provides clear, well-illustrated, and clinically relevant coverage of pregnancy, birth, and pediatrics to help student's master key clinical and critical thinking skills and prepare for the NCLEX® exam and successful practice. This Third Edition is enhanced by new care plans in the clinical chapters, new case studies, a new art program, a new pronunciation guide, and more. Online video clips of live births, Cesarean delivery, breastfeeding, pediatric milestones, the well child, and the hospitalized child bring concepts to life in dynamic full color. To ensure student mastery of key topics, an integrated workbook at the end of each chapter includes NCLEX-style questions (many NEW to this edition), study activities, and critical thinking: "What Would You Do?" exercises.

## **Introductory Maternity Nursing**

Previous edition has subtitle: "a nursing process approach."

## **Introductory Maternity and Pediatric Nursing**

A comprehensive examination of neonatal nursing management from a physiologic and pathophysiologic approach. The book features a complete physiologic and embryonic foundation for each neonatal system as well as coverage of associated risk factors, genetics, critical periods of development, nutrition and parenting.

## **Pharmacology**

Adele Pillitteri aims to ensure that today's students have a technical understanding, without losing the importance of compassion in their role as a nurse. The text presents pediatrics and maternity as a continuum of knowledge, taking a holistic approach and viewing maternity and pediatric content as a family event. The text links theory closely with application that helps students gain a deeper understanding of content and be better prepared to practice in their careers."--Provided by publisher.

## **Comprehensive Neonatal Care**

Now in a fully updated Fifth Edition, Shnider and Levinson's Anesthesia for Obstetrics, continues to provide the comprehensive coverage that has made it the leading reference in the field. The rising number of Cesarean births and the more advanced age of first-time mothers in the United States have brought with them an increased risk for complications, making the role of the obstetric anesthesiologist increasingly important. This comprehensive reference addresses maternal and fetal physiology; fetal assessment; anesthesia and analgesia in both vaginal and Cesarean delivery; neonatal well-being; management of fetal, maternal, and anesthetic complications; and management of coexisting disorders in the mother. The Fifth Edition includes a

new editorial team, a new full-color format, and new sections on Assessment of the Fetus, Anesthesia for Cesarean Delivery; Neonatal Well-Being: Old and New Concepts; Ethical, Medical, and Social Challenges and Issues; Maternal Safety, Difficult and Failed Intubation, Morbidity, and Mortality; and Anesthetic Considerations for Reproductive, In-Utero, and Non-Obstetric Procedures

## **Maternal and Child Health Nursing**

Get a solid foundation in maternity and pediatric nursing! Written in a clear, concise, friendly style, Introduction to Maternity and Pediatric Nursing, 8th Edition is the complete guide to caring for maternity and pediatric patients. This best-selling text is organized by developmental stages, discussions of pediatric disorders by body system from simple-to-complex and health-to-illness, and includes a focus on family health. This edition also contains newly updated NCLEX® style review questions, new case studies, new content on zika virus, QSEN and safety, and expanded phases of pregnancy. Evidence-based maternal-child content prepares you for the LVN/LPN to achieve higher levels of learning, a goal expressed by the IOM Committee on the Future of Nursing. Over 42 detailed, updated nursing skills introduce you to skills unique to maternity and pediatric care. Over 25 nursing care plans feature seven different formats/themes/styles, including unfolding case studies. The beginning concepts of critical thinking introduces you to this idea as a basis for clinical nursing care. Updated content on the influence of microbiomes on non-invasive pregnancy and newborn nursing care addresses its impact on the adult health of the newborn. Step-by-step application of the nursing process covers the hospital, home, community and use in improving global health. Expanded cultural practices as they relate to pregnancy, delivery and pediatric care in the community. Coverage of the use of expanding new technologies and computerized medication administration reinforce the nursing process and strengthen problem-solving skills as applied to maternity nursing. NEW! Discussion of new health threats include in-depth coverage of the Zika virus and Influenza NEW! Updated guidelines for hypertension and immunizations for infants and children. NEW! Updated QSEN goals and nursing responsibilities reflect the most recent changes. NEW! Expanded phases of pregnancy includes preconceptual, prenatal, intrapartum, postpartum and interconceptual care and nursing responsibilities. NEW! Updated nursing responsibilities related to global health reflect the "Baby Friendly Hospital" WHO initiative and interprofessional nursing communication related to nursing "hand-off care" and shift change reports. NEW! Updated NCLEX® exam-style review questions have been revised with alternate item formats at the end of each chapter. NEW! Expanded nursing and safety tips throughout include evidence-based online resources which provide pertinent information applicable in the clinical setting that reinforces what you have just learned while building on previously learned information. NEW! Expanded coverage of bioterrorism better reflects trauma related to pregnancy and pediatric care.

## **Shnider and Levinson's Anesthesia for Obstetrics**

This textbook provides an overview of pain management useful to specialists as well as non-specialists, surgeons, and nursing staff.
