AWS CWI API 1104 Part C Code Book exam question - AWS CWI API 1104 Part C Code Book exam question by Material Welding- Online Welding and NDT Training 10,140 views 4 years ago 13 minutes, 31 seconds - There are numbers of mock examinations available on my youtube channel to prepare for AWS-CWI part A exam also. So please ...

This exam covers four subject areas in **API 1104**, ...

Question 1. Carbon Steel Electrodes for Flux Cored Arc Welding can be found in what specification?

The term that best describes an acceptable weld flaw is

API 1104, groups base metals into three groups based ...

For metals with specified minimum yield strengths greater than 42000 psi, what is the minimum number of tensile tests required?

What determines the tip size for gas welding equipment?

AWS Specification A5.1 and A5.5 are used for welding

When preparing a tensile specimen for testing

AWS Specification A5.20 is used for welding

For welder qualification on pipe greater than 4 1/2" in diameter, but less than or equal to 12-3/4" in diameter, the number of destructive test specimens required are?

In branch-on-pipe connection qualification, the finished weld

How often must Level III nondestructive testing personnel be re-certified?

Which of the following destructive or nondestructive testing methods may not be used?

Nondestructive testing personnel, other than visual inspection personnel, shall be qualified in accordance with which of the following?

How many root-bend specimens are required for 8-in. OD pipe with wall thicknesses 12.7 mm according to data in Table 3?

Who shall decide when weather conditions are suitable for welding?

For multiple qualification, a welder shall be required to perform (select two)

When automatic or semiautomatic welding is used, filler wire protruding into the inside of the pipe

When pipe is welded above ground, the working clearance around the pipe should not be less than?

Pipe ends of the same thickness should not be offset by more than

Who determines the type of inspection to be done?

... nondestructive testing method is specified in **API 1104**,?

Which welding process is specifically mentioned for use with this Code?

The process where the pipe remains stationary during welding is called

API 1104 applies to pipe welding that conforms to which specifications?

What is the total number of test specimens required for 8-in. OD pipe with wall thicknesses 12.7 mm according to data in Table 32

Which of the following is not specified as a requirement for visual weld inspection?

What process uses equipment that controls only the filler metal feed?

Which organization publishes a document on personnel certification used by this Code?

Filler metals that are coated shall be protected from

What topics does API 1104 cover?

Documentation of inspection personnel qualifications shall include?

How often shall levels I and II NDT personnel be recertified?

The maximum length of a crater crack is

What conditions must be considered when using ultrasonic testing on in-service welds?

For mechanized pipe welding, a lineup clamp

Which of the following methods is not specified in flash butt repair procedure?

When should NDT be performed on a flash butt weld?

AWS CWI Part C API 1104 open book full mock examination - AWS CWI Part C API 1104 open book full mock examination by Material Welding- Online Welding and NDT Training 4,143 views 2 years ago 27 minutes - For answers, click this link: <https://www.materialwelding.com/aws-cwi-part-c-sample-questions-api,-1104,-codebook-mock-exam/> ...

Intro

If defects other than cracks are identified by nondestructive examination, which of the following would be acceptable to repair?

Which of the following requirements apply to testing fillet welds for welder qualification?

Whenever more than one radiographic image is used to inspect a weld, shall appear on each image and adjacent images shall

Welding on a surface containing scale

When welding an in-service pipeline, burn-through is a primary

For in-service welding, burn-through is unlikely if the pipes

For in-service welding, which of the following conditions are required for hydrogen cracking to occur?

For welder qualification of an in-service longitudinal seam weld on pipe with a 12-inch (300 mm) OD and a wall thickness of 1 inch (25 mm), which test specimens are required?

For in-service welds, the carbon equivalent of the material to which the procedure applies should be identified. Which of the

When welding pipe above ground, the working clearance around the pipe at the weld should be not less than

The company may authorize weld cracks to be repaired provided that

When internal concavity is visually identified and the density of the radiograph does not exceed that of the adjacent

A welder must be requalified if there is a change in filler metal from

A film radiography procedure shall specify

Procedure specifications must include

After a weld is repaired, it shall be reinspected using which of the following test methods?

The company shall retain documentation of the qualification of welding inspectors, which shall include, but are not necessarily

During qualification of an in-service welding procedure for branch and sleeve welds, when should the face bends be

In-service welds that contact the carrier pipe may be particularly susceptible to which of the following?

Welding procedures for in-service welding that produce HAZ hardness values in excess of 350 HV should be evaluated with

To use the alternative acceptance standard for girth welds Appendix A, the company must

During qualification of a welding procedure to be used with the alternative acceptance standard for girth

welds Appendix A .

welds Appendix A , what is the maximum height of a stacked imperfection from weld starts and stops in a weld on pipe with a

For fillet-weld procedure qualification, after the test specimens are cut and broken, the exposed surfaces of each fillet

Which of the following standards may be used to certify non-destructive testing personnel for magnetic particle testing (MT) in API 11042

34. A company may authorize weld cracks to be repaired provided the crack is less than of the weld length

When materials or weather conditions make preheating necessary, preheating should be done

During radiographic testing, the film or other imaging media shall be interpreted by

A copy of the radiographic procedure details shall be furnished to the

What discontinuity is found between two adjacent beads or

The tensile strength of a butt weld for procedure qualification, including the fusion zone of each specimen

43. Which of the following shall be stored in a clean dry place where the conditions will not detrimentally affect the emulsion?

A company may reject any weld that appears to meet the standards of acceptability if, in its opinion

A procedure specification for automatic welding shall include

The crown surface of the weld should not be raised above the parent metal by more than

Welder qualification with 17016-A1 electrodes also covers production welding with

Pipe end Geld bevels are allowed to be made by: A machine tool cutting

Which of the following changes would require procedure requalification?

Who shall be responsible for the protection and personnel monitoring of every person working with or near radiation sources?

Processes other than those described in **API 1104**, may ...
