

INCIDENT INVESTIGATION FORM NURSING

Lilian Nitzsche

Incident Investigation Form Nursing Introduction

Patient Safety and Quality

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need to know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)." - online AHRQ blurb, <http://www.ahrq.gov/qual/nursesshdbk/>

Accident Book

With the recent new and radical developments in the health care field that have been introduced at a breathless pace, nurse administrators must work to stay informed of the developments that affect their nursing departments both directly and indirectly. The Nursing Administration Handbook has a long track record, both as a textbook and as a hands-on tool for nurse executives seeking insight and step-by-step guidance in all aspects of administration. The fourth edition of this text surveys the entire field of nursing administration and incorporates the most significant new developments and current practices.

Near-Miss Book

The second edition of this well-received book, the first to provide detailed guidance on how to conduct incident investigations in primary care, has been thoroughly revised and updated throughout to reflect the current nomenclature for different aspects of the investigatory process in the UK and the latest format for incident reporting. Key features: Explains how to recognise a serious clinical incident, how to conduct a root cause analysis (RCA) investigation, and how and when duty of candour applies Covers the technical aspects of serious incident recognition and report writing Includes a wealth of practical advice and 'top tips', including how to manage the common pitfalls in writing reports Offers practical advice as well as some new and innovative tools to help make the RCA process easier to follow Explores the all-important human factors in clinical incidents in detail, with multiple examples and worked-through cases studies as well as in-depth sample reports and analysis. At a time of increasing regulatory scrutiny and medico-legal risk, in which failure to manage appropriately can have serious consequences both for service organisations and for individuals involved, this concise and convenient book continues to provide a master class for anyone performing RCA and aiming to demonstrate learning and service improvement in response to serious clinical incidents. It is essential reading for any clinical or governance leads in primary care, including GP practices, 'out-of-hours', urgent care centres, prison health and NHS 111. It also offers valuable insights to any clinician who is in training or working at the coal face who wishes to understand how serious clinical incidents are investigated and managed.

Legal and Ethical Issues

The basics of fundamental and general nursing science are presented in this health resource for auxiliary,

enrolled, and registered general nurses. A strong community nursing focus infuses the outcome-based teachings and questions to stimulate further discussion. Practical information on nursing in South Africa is provided, including working in the legal framework, managing the challenges of nursing in a culturally diverse society, and dealing with patients suffering from HIV and AIDS. Medical teachings on the use of oxygen, temperature regulation, mobility, and skin integrity complement the ethical discussions.

Nursing Administration Handbook

Through an examination and assessment of the body at a death scene, the medicolegal death investigator (MLDI) must be able to recognize circumstances that point to what manner of death occurred be it natural causes, homicide, suicide, accident, or undetermined. A handy reference for use in the field and in the lab, *Death and Accident Investigation*

Introduction to Management and Leadership for Nurse Managers

Fundamentals of Nursing, 2e highlights the core themes of nursing, including nurse, person, health and environment, covering the fundamental concepts, skills and standards of practice. Research and evidence-based practice issues are highlighted to help introductory nursing students prepare for delivering care for culturally diverse populations across a continuum of settings. With up-to-date coverage of the Registered Nurse Standards of Practice (2016) and key pedagogical features such as our unique 'Spotlight on Critical Thinking' questions, this text challenges students to assess their own nursing practice and apply the concepts

to real-life clinical settings. Fundamentals of Nursing presents in-depth material in a clear, concise manner using language that is easy to read and has good coverage of topics such as rural and remote nursing and Aboriginal and Torres Strait Islander health. This text is complemented by the bestselling Tollefson, Clinical Psychomotor Skills: Assessment Tools for Nursing, which covers skills and procedures. A value pack of these two texts is available. Premium online teaching and learning tools are available on the MindTap platform.

Nurse's Legal Handbook

Each day a new law or regulation affects the way respiratory therapists perform their jobs. This basic legal guide contains the extensive information respiratory therapists need to know about the court system, lawyers, law, and litigation. Written by the author, a lawyer and therapist with 13 years of clinical experience ranging from floor therapy to administrative and management functions, this book combines the author's knowledge of the complex interactions in the legal system and how the legal system relates to therapy delivered at the bedside. A resource for students and professionals, the book presents 16 areas of the law, including medical negligence, hospital law and employment law. The text also contains a series of questions and answers about the subject areas of the law, and provides extensive guidance for therapists navigating the treacherous currents of ever changing laws. This is a book for anyone who treats respiratory therapy patients or manages therapists. Most legal texts are written either by non-lawyers or non-therapists. Non-lawyers do not understand the complex interactions in the legal system, and are not permitted to give advice. Non-therapists may understand the law very well, but be unable to relate to how therapy is delivered at the bedside. This book is written by a therapist who is a lawyer, and who has been at the bedside. With thirteen years of clinical experience ranging from floor-therapy to administration and management functions, the author understands how a hospital works. The result is a book that is useful both as a course-book and as a reference

From 1 October 2013, RIDDOR 2013 comes into force, which introduces significant changes to the existing reporting requirements. The main changes are to simplify the reporting requirements in the following areas: the classification of major injuries to workers is being replaced with a shorter list of 'specified injuries'; the previous list of 47 types of industrial disease is being replaced with eight categories of reportable work-related illness; fewer types of dangerous occurrence require reporting. This leaflet aims to help employers and others with reporting duties under RIDDOR, to comply with RIDDOR and to understand reporting requirements.
